

AKCENTRALEN Refrigeration monitoring

Optimizes and
quality ensures
over 1600
grocery retail
stores

A unit that works for you

About

AK-Centralen has optimized, monitored and quality-assured Danish supermarkets and department stores since 1996. AK-Centralen takes advantage of advanced and proprietary programs that records customer data from 95% of all regulators and gateways installed in Danish food retailing. AK-Centralen covers stores 24/7 with over 20 specially trained operators. AK-Centralen serves over 1600 Danish subscribers.

flexible solutions for the specific needs of the grocery retail chain

GETTING STARTED

As a new subscriber with AK-Centralen only a few things have to be in place before the optimization starts.

- Your refrigeration equipment must be controlled by Adap-Kool® or a similar solution.
- Registration of your equipment and sensor placement (Including a possible relocation of the sensors).
- The equipment must be set up for external communication (We can advise).
- We agree on a master of parameters.
- We agree on the mandate.
- We gather the necessary information.
- We agree on your contact person.
- The contractual basis and the price agreement is made.

YOUR STORE IS BEING OPTIMIZED!
